EXPERIENCE

Web Applications Developer

Management and Operation Software

- 📅 10/2023 - 05/2024 📍 SUNGGA VINA / PHOTO TIME VN
- Participated in the development of an access management system that ensures secure and authorized access for users across different branches.
 - Enhanced the user interface using ReactJS and MUI, improving user experience and adding multilingual support for Korean and Vietnamese.
 - Implemented simple yet efficient warehouse management processes, including invoicing, revenue tracking, and debt management, etc.
 - Enhanced system performance on the Node.js server with NoSQL by improving security, implementing caching, and optimizing the database.
 - Developed requested features and wrote unit tests to minimize errors during usage.
 - Aggregated data into chart tables and implemented batch jobs to support regular data backups and updates.

Developed the system

Revenue website

- 📅 11/2023 - 05/2024 📍 SUNGGA VINA / PHOTO TIME VN
- Designed and coded a responsive user interface using C# and JavaScript, increasing mobile.
 - Developed additional data retrieval features based on SQL database.
 - Enhanced features such as data display on calendars, pagination, statistics, and data retrieval.
 - Developed a custom data retrieval system in SQL, enhancing reporting capabilities and decision-making speed for management.
 - Integrated user statistics from the mobile app into the revenue dashboard for easier management and data retrieval.
 - Created batch jobs to facilitate regular data storage.

Front-End Developer | Lead Back-End Developer

Affiliate marketing website

- 📅 06/2024 - 10/2015 📍 Tikpii Technology
- Designed and coded responsive user interfaces using technologies such as Next.js, MUI, and Tailwind CSS.
 - Used measures such as output encoding and input validation to prevent malicious code injection into the website.
 - Communicated and provided solutions and feedback aligned with client needs.
 - Designed the database and provided a clear flow for the server.
 - Spearheaded the database migration project to NoSQL, enhancing data integrity and system stability.
 - Implemented automated testing procedures for web applications using Jest.

EDUCATION

Information Technology

IUH - Đại học Công nghiệp TP.HCM

📅 2019 - 2023

SUMMARY

With 2+ years of experience in both front-end and back-end development, I have honed my skills in HTML, CSS, JavaScript, React, Angular, Node.js, Express, MongoDB, and PostgreSQL.

PROJECTS

Web Applications Smart-note

Used ReactJS to develop drag-and-drop functionality for folders, enable the creation of multiple spaces, invite users via email, and implement real-time features to enhance user interaction.

See more at <https://github.com/thanhluan0309/frontendDACN>

e-commerce platform

An e-commerce website with features such as a shopping cart, order management, and responsive customer accounts.
